

KYC Module – Issues & Required Improvements Report

Project: Loan APK Application

Country Context: Zambia

Module Affected: KYC (Know Your Customer) & User Account Flow

1 Document Upload (KYC) – Critical Issues

Current Problems

1. The app allows users to:
 - Upload **any image format** (including unsupported formats).
 - Upload **the same file repeatedly** (duplicate file name issue).
 - Upload **non-image files renamed as images**.
2. No validation to ensure:
 - The image is in **PNG or JPG only**.
 - Selfie is a **live camera capture**.
3. File names are not validated or renamed — users can continue uploading the same invalid file.

Affected Fileds

- ❖ Download NRC Front / View NRC Front

- ❖ Download NRC Back / View NRC Back
- ❖ Download Selfie / View Selfie
- ❖ Download Bank Statement / View Bank Statement
- ❖ Download Payslip 1 / View Payslip 1
- ❖ Download Payslip 2 / View Payslip 2
- ❖ Download Payslip 3 / View Payslip 3
- ❖ Download Signature / View Signature

Required Improvements

1. File Type Validation(Image)

Enforce strict validation:

Allowed formats:(mime type)

- .jpg
- .jpeg
- .png
- .webp

2. File Type Validation(Doc)

Enforce strict validation:

Allowed formats:(mime type)

- .pdf

Backend validation must also be enforced (not only frontend).

2. Live Selfie Capture (Mandatory)

- ❖ Selfie must be captured using:

- In-app camera
 - Timestamp needs to be recorded
 - ❖ Disable gallery upload for selfie
 - ❖ Add:
 - Face detection validation
 - Liveness detection (blink or head movement check – optional improvement)
-

3. Prevent Duplicate Upload

- ❖ System should:
 - Generate unique file names on upload (UUID).
 - Reject duplicate hash of same file.
 - Prevent re-upload of the same image for different fields.
-
-

2 Input Field Validation Issues (Zambia Format Required)

Bank Details Section

Current Problems

Example of wrong inputs accepted:

Bank sort code: 1456677788889099887778 (too long)

Bank account number: This is not an account 101918182iu2

 Required Validation Rules (Zambia Standards)

Field	Validation Required
Bank Name	Dropdown list of valid Zambian banks
Branch	Text only (no numbers/special chars)
Sort Code	Numeric only, max 6 digits
Account Number	Numeric only, 8–13 digits
Account Name	Letters only

 Personal Information Section

 Current Problems

The system accepts:

Identification: 88888899sjjjjsopsoiwjwhehhhee

Zipcode: (empty)

Address: Arabic Iran out of Lusaka

 Required Validation Rules

Field	Required Format
First Name	Letters only
Last Name	Letters only
Gender	Dropdown (Male / Female / Other)
DOB	Date picker (18+ validation mandatory)
Identification (NRC)	Format: XXXXXX/XX/X (Zambia NRC format)

Mobile	Must start with 07, 10 digits only
Email	Proper email regex validation
City	Dropdown (Zambian cities)
Province	Dropdown (Zambian provinces)
Zipcode	Numeric only (optional if not applicable in Zambia)

3 Location Handling (Major Requirement)

Current Issue

User types location manually.

Required Improvement

- ❖ Force:
 - Enable GPS
 - Request location permission
 - ❖ Auto-capture:
 - Latitude
 - Longitude
 - Physical address via reverse geocoding
 - ❖ Prevent manual editing of detected locations.
 - ❖ Users must enable live location to proceed.
 - ❖ Or use google places to search and select location
-

4 Missing Login & Resume Functionality (Critical System Gap)

Current Problem

- ❖ No login page for existing users.
 - ❖ If a user stops midway in KYC, they cannot resume.
 - ❖ No OTP verification system.
 - ❖ No ability to reapply or update loans.
-

Required Features

1 User Authentication

Add:

- ❖ Login via:
 - Email + Password
OR
 - Mobile Number + OTP
-

2 OTP System

- ❖ Send OTP via:
 - SMS (Zambia numbers only)
 - Email
- ❖ OTP expires in 2–5 minutes.

- ❖ Limit OTP retries (max 3 attempts).
 - ❖ Enable autofill from inbox
 - ❖ User must be able to paste in the all OTP digits at once (from clipboard).
-

3 Resume Incomplete KYC

If:

- ❖ User exits before completion,

Then:

- ❖ Save draft in database.
 - ❖ After login, redirect to:
 - "Continue KYC" screen.
-

4 Loan Reapplication

If user already completed KYC:

- ❖ Allow:
 - Reapply for new loan.
 - Update bank details.
 - Update contact details.
- ❖ Keep previous documents unless expired.
